

## Enquiry Framework for Reviewing Capacity Development – A List Of Possible Questions

The grid presents a number of questions that could form the basis for an organisation to review or evaluate its capacity development (CD) work with partners. ‘Specific topics’ are organised in relation to a number of over-arching ‘*broad areas*’ which correspond to the CD stages, as well as to different levels of change (i.e., immediate changes, short term/longer term outcomes and impact). Each ‘specific topic’ has a number of ‘*essential questions*’ that are necessary for a review of any type of CD and a number of more ‘specific *‘probing’ questions*’ which provide opportunities to probe deeper into various aspects of some, but not all, of the ‘essential questions’. The ‘probing’ questions were chosen from a range of possible questions at this level, with a view to illustrating enquiry around the most important aspects of a CD process.

Broad Area	Specific Topic	Essential Questions	Specific ‘Probing’ Questions
INITIAL ENGAGEMENT AND OVERALL DESIGN	Initial engagement with partners about the initiative	<ul style="list-style-type: none"> <li>In what ways, if at all, were the design, implementation or results of the initiative influenced by the way the initial engagement took place?</li> </ul>	<ul style="list-style-type: none"> <li>How was the engagement with the partner’s CD work initiated?</li> <li>How far was any guidance or ‘good practice’ on engaging followed?</li> <li>To what degree was there a shared understanding of the nature of the <i>existing</i> relationship between you/partner?</li> <li>Were any criteria (pre-conditions) for collaboration on the CD initiative established and reviewed?</li> <li>In relation to the CD support, to what degree were underlying principles, mutual expectations, roles and risks discussed and agreed?</li> <li>Were any formal agreement and relationship monitoring mechanisms established?</li> </ul>

Broad Area	Specific Topic	Essential Questions	Specific 'Probing' Questions
	Overall design  (this refers to the identification of the purpose and overall understanding on how capacity change emerges)	<ul style="list-style-type: none"> <li>• How relevant, realistic and appropriate was the overall design?</li> <li>• How robust were any assumptions you had made about how capacity change might contribute to the partner's (and your) Mission/programme goals/strategy?</li> </ul>	<ul style="list-style-type: none"> <li>• What were the original drivers/motives for the change and how far were they clearly understood by all parties?</li> <li>• How far was there clarity on how change in individual and organisational capacity might contribute to increased capacity in responding to needs/advocacy/implementing partner's organisational strategy or Mission?</li> <li>• How clear and transparent was communication to key stakeholders about the reasons for the CD initiative?</li> <li>• How far was the 'value-added' of your support effectively identified in the design of the initiative?</li> <li>• Was there any mapping of other relationships that could have been relevant to the initiative?</li> </ul>
CAPACITY DIAGNOSIS	Data collection	<ul style="list-style-type: none"> <li>• How effective and appropriate were the data collection methods, tools and processes?</li> </ul>	<ul style="list-style-type: none"> <li>• Were the parameters for the assessment clearly understood by all? Were the right things assessed?</li> <li>• Were the right people involved in the data collection process?</li> </ul>
	Analysis	<ul style="list-style-type: none"> <li>• How effective was the analysis process – were the outputs relevant to the needs of the initiative/overall design objectives?</li> <li>• Did the analysis process <i>in itself</i>, contribute in any way to strengthening capacity?</li> </ul>	<ul style="list-style-type: none"> <li>• Were the right people involved in the analysis process?</li> <li>• How far was the management of this diagnosis stage effective, efficient and appropriate?</li> <li>• Any comments on 'value for money' of the way the diagnosis phase was designed and implemented?</li> </ul>

Broad Area	Specific Topic	Essential Questions	Specific 'Probing' Questions
PRIORITISING AND PLANNING	Prioritisation of areas for attention and production of a CD Action plan	<ul style="list-style-type: none"> <li>• How relevant and realistic was the CD Action plan?</li> <li>• How far was the plan of 'good quality'?<sup>1</sup></li> </ul>	<ul style="list-style-type: none"> <li>• To what degree was there a clear, shared vision of what might emerge from the CD work?</li> <li>• How far did the CD Action plan cover the right areas/respond to the partner's development needs?</li> <li>• How far was there clarity about the desired changes and what type of CD activities and methods might be most appropriate?</li> <li>• To what degree was the sustainability of outcomes addressed in the plan?</li> <li>• How far was the CD Action plan realistic in terms of resource requirements, timescales and energy required for the work?</li> <li>• How flexible and responsive was the plan?</li> <li>• Was the plan 'owned' and understood adequately within the partner organisation?</li> <li>• How far did relevant staff in your organisation engage with, and commit to, the partner's CD Action plan?</li> </ul>
IMPLEMENTATION + IMMEDIATE OUTPUTS & OUTCOMES	The implementation process (the overall fulfilment of the CD Action plan & specific activities)	<ul style="list-style-type: none"> <li>• How far was the CD Action plan put into practice?</li> <li>• What worked well, or could have been better, in terms of the overall implementation process?</li> </ul>	<ul style="list-style-type: none"> <li>• If certain planned activities did not occur, what were they and why was this?</li> <li>• If certain unplanned activities took place, what were they and why was this?</li> <li>• How much did learning (and subsequent adjustment) take place during implementation?</li> </ul>

<sup>1</sup> See Checklist for Assessing CD Action Plans for ideas of quality factors for consideration.

Broad Area	Specific Topic	Essential Questions	Specific 'Probing' Questions
	<p>The immediate outputs or changes such as: new systems or policies in place workshops and courses delivered exposure visits successfully completed immediate changes in understanding, skills etc.</p>	<ul style="list-style-type: none"> <li>• To what extent were planned immediate outputs or changes achieved?</li> <li>• What unplanned/unexpected immediate outputs or changes occurred? (positive <i>and</i> negative)</li> <li>• To what degree did the processes used to produce the outputs reflect general good practice and/or your own CD principles?</li> <li>• What were the views of the participants, or the partner's stakeholders, concerning the outputs or immediate changes?</li> </ul>	<ul style="list-style-type: none"> <li>• To what degree did the outputs that were achieved reflect the desired quality?</li> <li>• How far was there systematic monitoring and review of the quality and appropriateness of the CD work?</li> <li>• What levels of participant/partner satisfaction was there with the outputs?</li> <li>• What was the nature of any <i>immediate</i> changes reported by participants/partner/your staff e.g. in understanding, skills etc?</li> <li>• Any major differences of perspective amongst the participants/partner/your own stakeholders?</li> </ul>

Broad Area	Specific Topic	Essential Questions	Specific 'Probing' Questions
SHORT TERM OUTCOMES	<p>Consistent capacity changes such as:</p> <p>sustained change in understanding, skills, behaviours</p> <p>consistent use of new systems and processes</p> <p>changes in relationships</p> <p>Changes in the internal 'health' of the partner</p>	<ul style="list-style-type: none"> <li>• To what extent were planned short-term sustained changes achieved?</li> <li>• What unplanned/unexpected changes have occurred? (positive <i>and</i> negative)</li> <li>• Overall, how has the partner been strengthened by these changes?</li> </ul>	<ul style="list-style-type: none"> <li>• Were there any noticeable differences in degree/type of change amongst different categories of participants/partner stakeholders?</li> <li>• What evidence is there to illustrate the degree to which the CD work that you supported has contributed to the changes (planned/unplanned)?</li> <li>• What other factors/actors contributed to these changes?</li> <li>• What external/internal factors (including relationships) enabled or inhibited the achievement of these changes?</li> <li>• How sustainable are the changes?</li> <li>• In what ways, if any, have these changes led to an overall 'strong and healthy organisation'? (for holistic CD work particularly)</li> </ul>

<p>LONGER TERM<sup>2</sup> OUTCOMES</p>	<p>The results of the short-term changes such as:          Changes in quality of partner services and programmes (including advocacy)          Changes in quality of relationships and collaborative work with others          Changes in overall organisational resilience</p>	<ul style="list-style-type: none"> <li>• To what extent were planned longer term changes achieved?</li> <li>• What unplanned/unexpected changes have occurred? (positive <i>and</i> negative)</li> <li>• How, if at all, is the overall partner organisation benefiting from these longer-term changes? (e.g. from the increased effectiveness + efficiency in programme or service delivery or more effective external collaborative work due to increased trust levels)</li> <li>• To what degree did the CD work contribute to these longer-term changes</li> </ul>	<ul style="list-style-type: none"> <li>• What evidence is there that the longer-term outcomes are sustainable?</li> <li>• How evenly spread are the benefits from these longer-term changes e.g., across all levels of operation (national/local etc) or areas of work?</li> <li>• What evidence is there to illustrate the degree to which the CD work contributed to the longer-term changes (planned/unplanned)?</li> <li>• What CD support activities were particularly significant and influential?</li> <li>• What other factors/actors/relationships (internal and external) <i>contributed</i> to these longer-term changes?</li> <li>• What other factors/actors/relationships (internal and external) <i>inhibited</i> the achievement of these longer-term changes?</li> <li>• If there were any undesired/negative changes, what (if any) aspects of the CD work contributed to them?</li> </ul>
---	---	--	--

---

<sup>2</sup> It is important to recognise that in some cases longer term outcomes might emerge within a relatively short timeframe. The main characteristic of longer term outcomes is that they come about as a result of the *application* of the short term outcomes. ‘

<p>IMPACT</p>	<p>Achievement of programme goals or Mission objectives e.g. Improvements in livelihoods</p>	<ul style="list-style-type: none"> <li>• Is there any link between changes (positive/negative) in the situation of the people you work with and the CD work?</li> <li>• Is there any link between the achievement of the partner's organisational strategic objectives (in any sphere) and the CD work?</li> <li>• If there is any identified link, what helped this?</li> </ul>	<ul style="list-style-type: none"> <li>• What has changed, and for whom?</li> <li>• What evidence is there of any CD contribution to the achievement of the positive changes, or the strategic objectives? Would the changes have happened anyway?</li> <li>• What factors enabled that CD contribution? These could include design, resources, human factors, external factors, relational etc.</li> <li>• Are there any specific activities or processes used during the CD work that stand out as having made a particularly strong contribution to this change?</li> <li>• Is there any identifiable <i>chain</i> of changes that could be said to have played a key role? i.e. any specific immediate/short term changes that generated longer term outcomes that contributed to impact?</li> <li>• Were there any factors that may have inhibited the CD effort from contributing to impact?</li> </ul>
